The objective of this project will be the rehabilitation and stabilization of the earthen slopes covering the North Yonkers Trunk Sewer as required under the Capacity Assurance, Management, Operation and Maintenance (CMOM) Program to insure the environmentally compliant operation of the County's sewage collection system. The Program requires the existing trunk sewer be inspected periodically and any deficiencies corrected in order to prevent unnecessary damage to the collection system, as well as the surrounding environment.

This contract is in the public's best interest because it effectuates long-term maintenance and repairs as required by the CMOM Program for this section of trunk sewer avoiding potential adverse environmental impact to the surrounding properties and the Hudson River, thereby promoting public health policies and laws.

The Department will track scheduling and accomplishments by the contractor and perform on-site inspections to ensure the successful completion of this project.

It is my recommendation that Contract No. 10-532 be awarded to Abbott & Price, Inc. in the amount of \$5,429,808.00.
